HALFTOKEN.XYZ

A revolutionary digital crypto asset for the BSC network

Whitepaper 2024

Disclaimer

This white paper does not constitute a prospectus or offering document and is not a solicitation for investment and does not constitute an offer of financial instruments, securities to the public or a collective investment scheme. Any decision to purchase or trade HALF tokens, representative of **halftoken.xyz** shall be based on consideration of this white paper as a whole.

It is solely up to you to ensure that no prior or subsequent approval, notification, registration or licence is needed or if such is needed, it is solely up to you to obtain such prior or subsequent approval, notification, registration or licence or require any form in the country where you are a citizen, national, resident or having a similar connecting factor, or incorporated, registered or effectively managed, and the Issuer shall not in any way be liable for any non-conformity of the above by you.

This white paper, the HALF tokens and/or the holding, use and trading of the HALF token carries no rights, whether express or implied, other than for their use on the evmcore.com platform and future rights to trade on cryptocurrency exchanges, HALF tokens do not represent or confer any ownership right or stake, share or security or equivalent rights, intellectual property rights or any other form of participation relating to the Issuer.

The key objectives of HALF

1. **Reduce manipulation:** Our protocol restricts the amount anyone can sell at any one time to 50% of their wallet balance, effectively preventing large holders from crashing the market by selling off their entire stake in a single transaction.

2. **Promote Organic Growth:** By limiting sell orders to half of a holder's balance, we encourage a more gradual, organic price discovery process. This allows the value of $HALF to grow in a more stable and sustainable manner, benefiting all participants in the ecosystem.

3. **Enhance Market Stability:** The $HALF token is designed to bring stability to a market well-known for its volatility. Our unique selling mechanism acts as a built-in safeguard against the rapid swings in token value, creating a more predictable and secure investment landscape.

THE CURRENT ISSUE

Extreme price volatility for new tokens being launched

Enhance Market Stability: The $HALF token is designed to bring stability to a market well-known for its volatility. Our unique selling mechanism acts as a built-in safeguard against the rapid swings in token value, creating a more predictable and secure investment landscape.

Encouraging Responsible Trading: This mechanism not only deters massive sell-offs but also encourages holders to think strategically about their investments, promoting a healthier trading environment and a more robust digital currency.

Building a Stronger Community: By mitigating the impact of whales, $HALF fosters a more equitable and democratic ecosystem. Our approach empowers smaller investors and levels the playing field, allowing for a truly community-driven growth model.

HALF MECHANISM

You cannot "sell" more than 50% of your HALF tokens in **any single transaction** to the DEX.

If you attempt to do this, the transaction will error, will revert, or you will simply not be able to complete then transaction. For example, Metamask will not launch to allow you to complete the transaction.

You must always ensure the amount of tokens you are selling, is 50% (or less) of the total number of tokens in your wallet

Note: the transfer (and transferFrom) functions are unable to distinguish between a "sell" (swap) on a DEX and the process of adding liquidity, as both processes involve the recipient of tokens being a DEX, therefor, the limitation of sending 50% of your stash to a liquidity pool also applies.

FAQ

Q1. Is there a limit on "buying" HALF from the DEX?
A1. No, there is no limit in buying

Q2. I'm trying to add ALL my tokens to the liquidity pool and it won't let me?
A2. the transfer (and transferFrom) functions are unable to distinguish between a "sell" (swap) on a DEX and the process of adding liquidity, as both processes involve the recipient of tokens being a DEX, therefor, the limitation of sending 50% of your stash to a liquidity pool also applies

Q3. Is there a limit on transferring tokens from one wallet to another?
A3. No, there is no limit in token transfers from wallet to wallet

Q4. Is this 50% a "tax"?
A4. No, there are no buy or sell taxes in our contract, simply a mechanism to stop someone sending more than 50% of their HALF token holdings to a DEX in any single transaction

Q5. I'm seeing errors when I try to sell my tokens?
A5. Ensure the amount you are attempting to sell to the DEX is 50% (or less) of your total, otherwise some DEX's will show error messages, and some will simply do nothing at all.

THE TOKEN

Token name: HALF
Total supply: 10,000,000,000 (10 billion)
Token type: ERC20
Token Contract Address: TBC
Token launch: Binance Smart Chain (Pancake swap)

THE TOKENOMICS

Total Supply: 10,000,000,000 (10 Billion) HALF Tokens

- **7,500,000,000 HALF (75%):** Available to create liquidity pairs on the DEX
- **2,000,000,000 HALF (20%):** HALF TEAM – To form a Treasury, managed by a Binance Smart Chain Gnosis Safe Multi-sig wallet. Used for developer incentives.
- **500,000,000 HALF (5%):** Marketing and giveaways

THE ROADMAP

Q1 2024 – halftoken.xyz full website and live token launch. A continued drive to forge partnerships with established companies, communities, ambassadors.

Q2 2024 – Exchange listing drive to push HALF token to major "Tier 1" CEX exchanges. Community to discuss adding new chains.
